

3D Rainbow Card

What you need:

- Card stock
- Paper
- Pencils or textas
- Scissors
- Glue

What to do:

- Fold your card stock in half.
- Cut a strip of paper, big enough to be your rainbow, the rainbow must end up being longer in length than the card stock when opened.
- On that strip of paper, colour across the strip in rainbow colours - Red, Orange, Yellow, Green, Blue, Indigo and Purple.
- Now it's time to fold the paper into a folded accordion. Fold the short edge of your rainbow approximately 1cm. Then flip over and fold in the other direction. Keep going until you have a full concertina rainbow!
- Add glue to each end of the accordion rainbow, glue it down inside your card stock and fold the card shut. Press gently but firmly. When you open up the rainbow it will be secured.
- Draw some clouds on paper, cut and glue them down in your card, making sure to leave space to be able to write in your card.
- Draw faces on the clouds.
