

# WHALE WATCH LIVE

Ever done any whale watching? There are many towns on the coast of Australia where you can watch whales. But if you are not travelling, why not watch whales live on your computer?

See them in their natural environment and in an aquarium.

Do whales behave differently in different environments?

[OrcaLab](#), a small land based whale research station nestled against the evergreen forest of Hanson Island in the waters of the "Inside Passage" of northern Vancouver Island in British Columbia, Canada.

Check the local weather and watch live stream coming from multiple cameras in different locations.

But be patient, Orca whales have their own lifestyle and may not appear immediately.

[Georgia Aquarium](#) is a non profit organisation committed to inspiring awareness and preservation of oceans and aquatic animals worldwide.

Watch the Beluga whales in action from one fixed camera position.
