

LEMON BUBBLES

What you need:

- A Lemon
- Fork
- Bi-Carb Soda
- Food Colouring

What to do:

- Take a lemon and cut one end off. **An adult should do this part of the experiment.**
- Take a fork and mix up the inside of the lemon. (Make sure to leave everything inside the lemon because we need all the juice for the experiment.)
- Add a couple drops of food colouring and stir it up a little more.
- Now add a scoop of baking soda and watch the bubbles appear up at the top of the lemon opening.

Show us what you have made on the [Kids Club Online Gallery](#).
