

RAINBOW SKITTLES

Let's make a rainbow using skittles!

What you need:

- Skittles
- White plate
- Cup of warm water

What to do:

1. Place the skittles around the edge of the plate. Have fun making a pattern! It's ok if you do not have a white plate, you can use any plate you have at home. White makes the rainbow pattern easy to see.
2. Pour the water slowly onto the middle of the plate. Stop when the water just covers all the plate.
3. Now watch the rainbow colours move towards the middle of the plate!
4. Take a photo of your rainbow and upload to the [Kids Club Online Gallery](#).
