

# Origami Ship

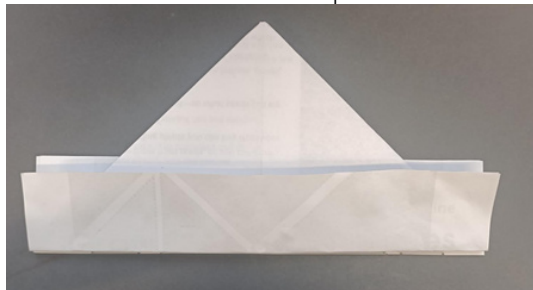

Fold an A4 piece of paper in half, longways like in the picture.

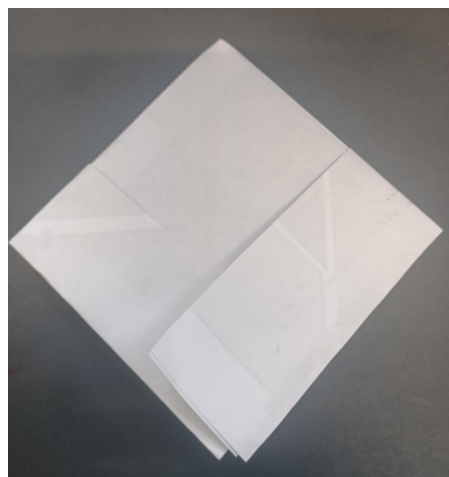

With the closed edge of the paper facing up, fold the two top corners down to the middle.

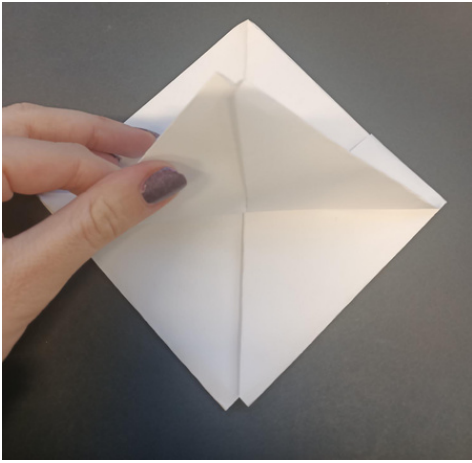

Fold the bottom edge up as far as it will go. Turn the piece over and fold up the other side. Your piece should now look like a pirate hat!

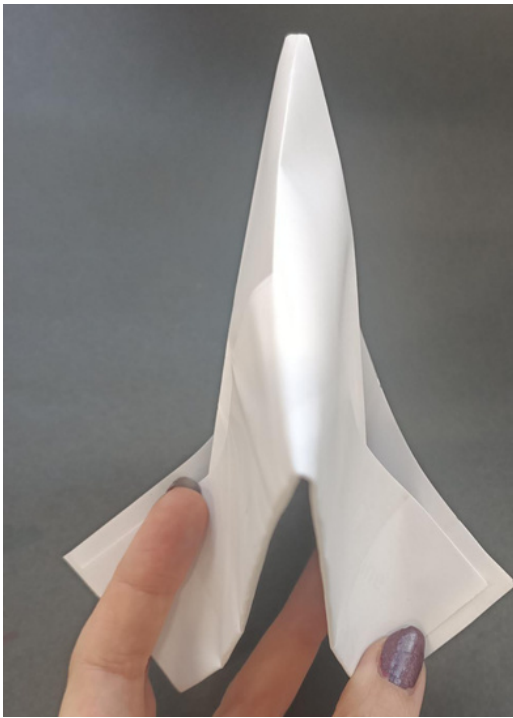

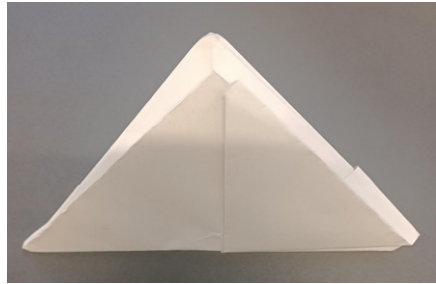

Holding the piece, open it up and squash fold so it becomes a diamond shape, like in the picture.

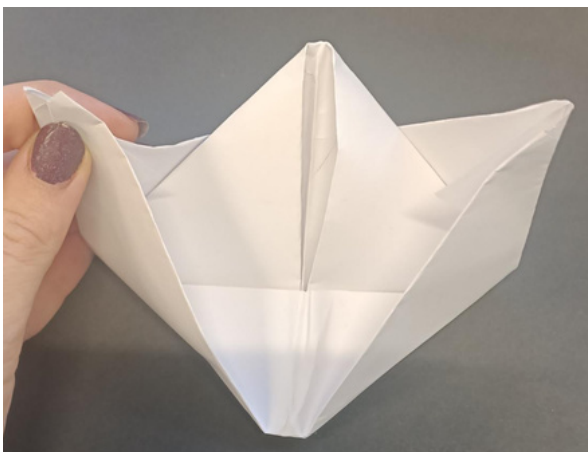

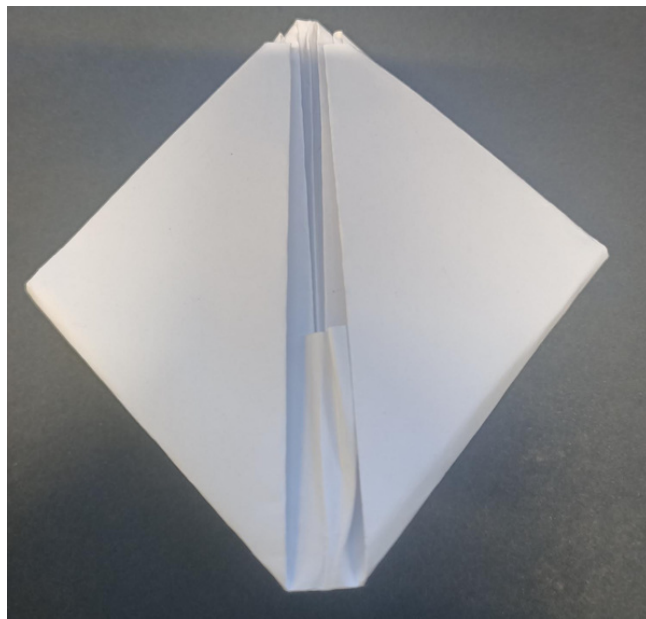

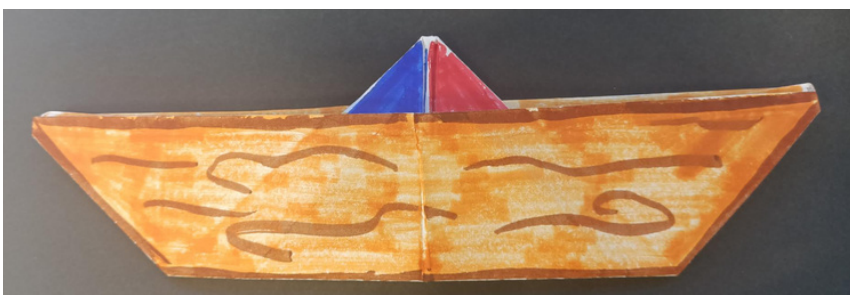

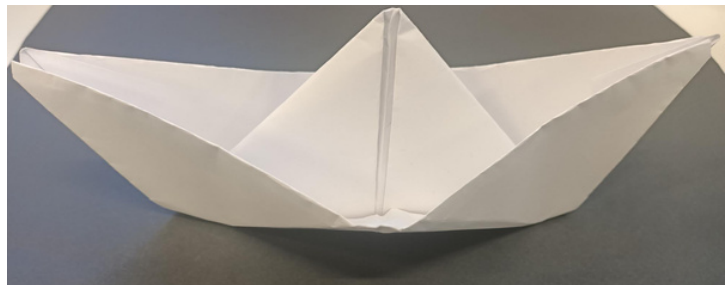

Fold the bottom point up to meet the top point. Turn over and repeat on the other side. You now have a triangle.

Place your fingers inside the bottom opening, and gently move the piece so it becomes a square.

Pull the top corners out, the piece will start looking like a boat.

Colour the boat in. Make the Paper Roll Pirate activity to go with the boat.
