

# mirror illusion photography

Do you like taking photos?

Yes.

How about using a mirror to create some illusions in your photographs?

What do you mean?

Mirrors reflect light and images. Sometimes if you carefully place a mirror and a camera together, you can create images that can trick the eye into seeing something different.

Don't forget, mirrors can reflect images of other mirrors. This creates another interesting illusion.

Think about using other reflective surfaces— pots, cars, water, glass, bubbles and metal spoons.

You can do this on your own, or you can get a friend or your family involved.

Check out some examples on the following page.

You might like to share your creations to the [Kids Club Online Gallery](#).
