Paper Helicopter Toy
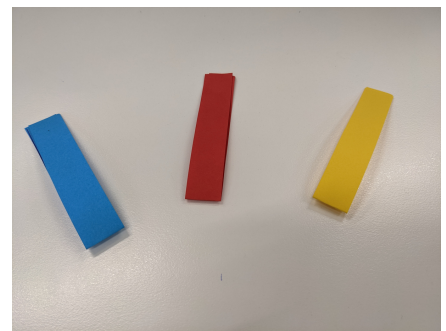

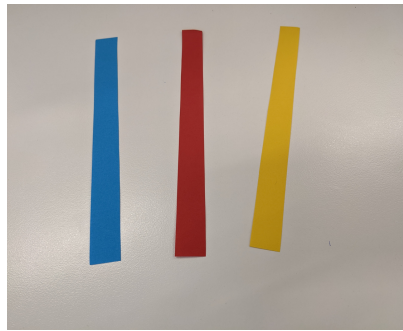

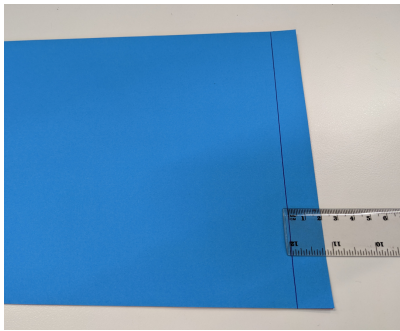

This quick and simple craft is perfect for quiet, summer days indoors.
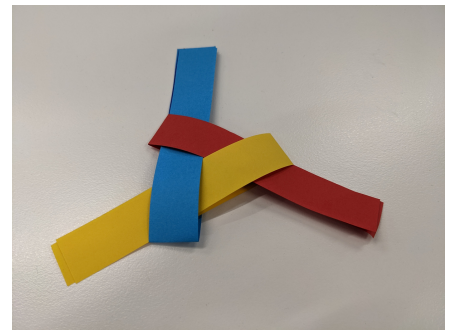

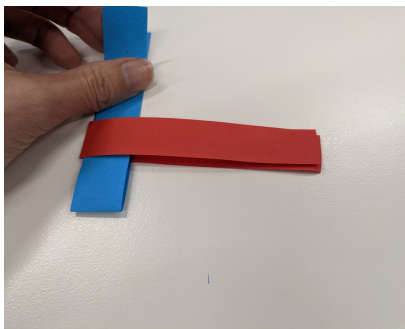

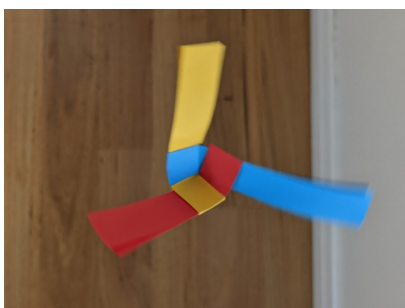

What You Need:

- Paper
- Scissors
- Ruler

What to Do:

- Cut 3 strips of paper (approx. 2cm wide and 21cm long).
- Fold the strips in half.

- Hook the 3 strips over each other, checking the pictures above to make sure that the folded and open edges are in the right place.
- Thread the last strip through the loop made by the first 2 strips.

- Gently pull the strips into place.
- Drop your helicopter and watch it spin!
- Try launching from different heights or experiment with different designs to see if you can make one that spins faster.
