

# making words with lego

Let's make words with Lego bricks!

You can create any word you like out of Lego. You might make your name, the name of an object, colour or feeling.

Start with a base plate and plan out how much space you will need based on how many letters in the word.

Some letters may be tricky if they have a round shape, use the above letters as an example of how to use bricks to create the right shape.

You can use any colour combinations that you like and decorate the edge around your word with bricks, trees, people or any lego that you like.

Share photos of your Lego creations on the [Kids Club Online Gallery](#).
