

Make a Pokeball

What you need:

- Paper
- Pencils/textas
- Scissors
- Sticky tape, stapler, glue

What to do:

1. Print the next pages, or draw two Pokeballs and one circle the same size.
2. Colour and cut out the plain circle. This will be inside the ball.
3. Colour in one of the Pokeballs. Cut it in half. Use sticky tape or staples to join the curved edges together. Leave the flat edge open. This should now fit on top of the inside ball.
4. Colour and cut out the other Pokeball. Fold this in half, gluing it together. Now attach to the inside ball around the edges, leaving the flat edge open. This creates a pocket.
5. Draw a Pokemon, or make up your own. Colour them in, cut out and you can slip the Pokemon inside the pocket of the Pokeball, then put the top half of the Pokeball on so the Pokemon is inside the ball.
