

BUTTERFLY WATCH LIVE

Ever sat in your garden and watched butterflies? There are lots of different types of butterflies, not just the ones who frequent your garden or local park. So why not watch varieties of butterflies live via an online stream.

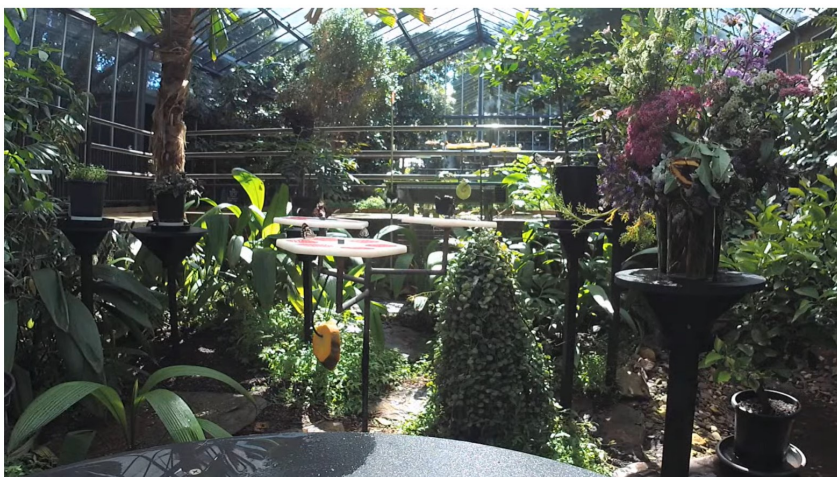

See them in their natural environment and in a butterfly house at the zoo.

Do butterflies behave differently in different environments?

[Zoos Victoria](#) bring the butterfly house to life from anywhere around the world with a live cam stream. Scroll down the page past all the other animals and find the Animal Cam for the Butterfly house.

But be patient, butterflies have their own lifestyle and may not appear immediately.

[Florida Museum](#) offers a live feed from the canopy cam in the Butterfly rainforest. Because this feed comes from the Northern Hemisphere, the Florida Museum offers a catch up footage from the previous day's daylight hours.
