

LEAF COLLAGE

Create a collage out of leaves.

Leaves have amazing colours and shapes. To make a collage out of leaves, we are going to have to go on a leaf hunt. Head out into your garden or into your local park. Try and find leaves that have fallen to the ground or ask your family/neighbours if you can pick some leaves from their gardens. You might also look for seed pods and bark.

Gather your leaves and other found items and head inside for some crafting.

You will need:

- Art paper as the base of your collage. Choose any colour you like.
- Glue Stick
- Leaves/seeds/seed pods/bark

Method:

Think about the type of collage you would like to create. Is it a scene from nature? Is it an animal? Is it an abstract image?

Lay out your leaf/seeds/seed pods/bark in a way that represents your art vision. Once you are happy with how the artwork looks, then use the glue to make everything stick to the paper.

You might like to share a photo of your creation to the [Kids Club Online Gallery](#).
