

PAPER CHAIN DRAGON

What you need:

- Scissors
- Glue/stapler/tape
- Paper strips. You can be thrifty and use scrap paper cut into strips for this

What to do:

1. Print out the pages and colour in the dragon head, tail and the paper strips. Cut these out.
2. Start making the paper chain for the body. You can draw or print out the paper strips with the scales, along with using scrap paper to make the body longer.
3. To make the chain, fold one strip into a circle and stick it together. Thread the second strip through the first and attach the ends together. Keep repeating this to make it longer.
4. When you are happy with the length of the paper chain, attach the dragon head and tail.
