

COLOUR ME CRAZY

Have you ever done colouring in and used sensible colours for everything?

Green is for the grass.

Blue is for the sky.

Yellow is for the sun.

What if we were to forget about sensible colours and went colour crazy with our colouring in?

Nothing should be the right colour, as it is in real life.

Imagine the grass was purple.

Imagine the sky was pink.

Imagine the sun was a rainbow.

You may never look at colouring in the same way again.

Try and challenge your self to colour-in without using real life colours. Sometimes it is harder than you think.

Print and colour the next pages. Or draw your own colouring sheets.

You might like to share your creation with the [Kids Club Online Gallery](#). And don't forget to say it was for "Colour me Crazy".
