

MAKE A RATTLE DRUM

What you need:

- Thick cardboard
- Scissors
- String
- 2 beads
- Hole punch, skewer or needle
- Handle (e.g. chopstick, straw or pencil)
- Craft glue
- Paint or markers to decorate the drum

What to Do:

Trace a circle onto some thick cardboard and cut it out. Paint or draw your design on the circle.

Use a hole punch to make two holes at the edge of the circle. If you don't have a hole punch ask a grown up to help make the holes using something sharp.

Glue the handle to the drum and let it dry. It's important that the handle is extra secure so that you can spin it fast. I used sticky tape as well as glue.

Thread the string through the holes and knot it tightly. Tie the beads to the end of the string and knot them in place. Play the drum by rubbing your hands together really quickly!
