

MAKE A UFO!

UFO stands for Unidentified Flying Object.
Let's make one from paper plates and a cup.

What you need:

- 2 paper plates
- 1 paper cup
- Colouring supplies
- Scissors
- Sticky tape
- Stapler

What to do:

1. Place the paper cup on top of one of the plates and trace around the base. If you don't have a paper cup at home, that's ok. Skip this step and you can still make the UFO!
2. Decorate and colour in your UFO.
3. Carefully cut the circle out. You may need an adult's help with this. If this step is too difficult then use sticky tape to stick the cup to the plate.
4. You can attach the cup to the hole you cut out using sticky tape on the other side of the plate so you can't see the tape. Then use a stapler or tape to attach the two plates together. Now you have a UFO!
5. Show us your finished UFO on the [Kids Club Online Gallery](#).
