

# RAINBOW FLAG

## What you need:

- Cardstock
- Pencils/textas
- Ruler

## What to do:

1. Rule a rectangle on the cardstock. Choose the colours you want for the rainbow.
2. Start by making a small dot in the middle of the rectangle. Then, one colour at a time, draw a line from the dot to the edge of the rectangle. Keep drawing lines around the page until it is full. Draw the lines close together and fill in the white areas with colour.
3. You can cut the finished art out to make a flag, or make a few and turn it into rainbow bunting.
4. What other patterns can you draw with rainbow colours? Here I used graphic markers and drew a line on the two edges of the page. I kept drawing lines of different colours, overlapping the colours until the page was full.
