

Colourful Geckos

Did you know that there are nearly 2000 species of geckos that come in 100 different colour and pattern combinations?

Decorate the geckos on the next page using the pictures below for inspiration or come up with your own designs.

Gecko Facts:

- Geckos can be found on all continents except Antarctica.
- They can shed their tail to escape predators and grow a new one.
- They have millions of tiny hairs on their toes and hundreds of tinier pads on each hair. This helps them to stick to surfaces really well, including polished glass!

Show us what you have made on the [Kids Creations Gallery](#).
