

Oil Pastel Peacock

Peacocks are beautiful birds with stunning tail feathers. In this activity, we are going to use oil pastels and create our own beautiful peacock.

What you need:

- Paper- artist or drawing paper works best for this.
- Oil pastels
- Grey lead pencil

What to do:

1. Using grey lead pencil, sketch out the peacock design on paper. You can print the peacock design and trace it if you find it challenging to draw.
2. Using the oil pastels, start colouring the peacock. Oil pastels are very smooth and blend easily. Choose colours that are similar and blend these together by overlapping, like light blue and green.
3. I used a Q-tip and a tissue to help blend the pastels colours together.

Show us what you have made on the [Kids Creations Gallery](#).
