

Watercolour Paper

What you need:

- Watercolour paper or cardstock
- textas
- Spray bottle with water
- Plastic pocket

What to do:

1. Using the textas, colour in a pattern on the plastic pocket. Because the plastic is shiny, the textas will not dry and the ink will stay damp.
2. Spray a little water on to the plastic pocket. Press the paper on top and smooth it with your hands. The ink will transfer from the plastic onto the paper.
3. Leave the paper to dry. You could turn your design into a card, bookmarks, or add more detail on it with a pen.
4. What different designs can you make? What happens when you mix colours together?

Show us what you have made on the [Kids Creations Gallery](#).
