

CUTE DONUT SQUISHY

What you need:

- Pencils/textas
- Sticky tape
- Stapler
- Scissors
- Stuffing for the squishy. I used the stuffing from inside an old pillow. Or you can use tissues or paper towel.

What to do:

1. Print out the two donut images. Colour them in and cut both out.
2. Start joining both edges together using the sticky tape. Leave a gap to put the stuffing in. You can also use a stapler around the edges, to make the squishy stronger.
3. Fill the squishy up with stuffing, then finish taping it together.
